

ABHIUDYA VERMA

MIS Executive | Reporting Analyst | Junior Data Analyst (Fresher)

Delhi, India | abhiudyaverma999@gmail.com | +91-8700816988 | [linkedin.com/in/abhiudyaverma](https://www.linkedin.com/in/abhiudyaverma) | [Abhiudyav.github.io](https://github.com/Abhiudyav)

PROFESSIONAL SUMMARY

B.Com graduate with a practical foundation in Excel, MIS reporting, Power BI, and SQL, built through independent, self-driven projects rather than classroom exercises alone. Comfortable with data cleaning, pivot tables, dashboard creation, and structuring reports for decision-making. Built an end-to-end AI-assisted email-to-Excel automation workflow using n8n, Python/FastAPI, and the Claude API, showing an ability to identify repetitive processes and automate them responsibly. Detail-oriented and consistent, with an accounting and business-data grounding from Tally ACE certification.

TECHNICAL SKILLS

Excel & MIS: Pivot Tables, VLOOKUP/XLOOKUP, IF Formulas, Conditional Formatting, Data Validation, Charts, Dashboard Creation, Data Cleaning, MIS Reporting

Power BI: Data Import, KPI Cards, Slicers, Bar/Line/Pie Charts, Basic Dashboard Development

SQL: SELECT, WHERE, GROUP BY, ORDER BY, INNER JOIN, SUM, COUNT, AVG

Automation & AI Tools: n8n, Python/FastAPI, REST API, JSON, Gmail Automation, Excel Automation, Claude API — used for AI-assisted workflow automation

Accounting & ERP: Tally ERP 9 (ACE Certified), Journal Entries, Ledgers, Bank Reconciliation, GST Basics, Inventory, Zoho Books (basic)

Other Tools: MS Word, PowerPoint, Google Sheets, Google Workspace

PROJECTS

AI-Powered MIS Executive Automation | n8n | Python/FastAPI | Gmail | Claude API | REST API | JSON | Excel Automation — Self-Learning Project

- Built an end-to-end workflow that monitors Gmail for incoming emails with Excel/CSV attachments, validating and extracting attachment and email content automatically.
- Connected a Python/FastAPI service to inspect workbook structure, so the Claude API could analyze actual spreadsheet content together with the email instructions.
- Designed a confidence-based decision layer: the AI returns a structured response (decision, confidence score, task, reason, required columns, requested operations); low-confidence requests trigger an automatic clarification email instead of an unsupervised edit.
- Implemented the Excel processing pipeline that carries out clear requests via FastAPI, tracks job ID/output filename/row counts, and emails the completed workbook back to the requester.
- Added error handling and retry logic across the API and processing steps to keep the workflow reliable end-to-end.
- Demonstrates workflow automation, API integration, AI-assisted decision logic, and practical MIS/reporting problem-solving.

Sales Data Dashboard | Power BI

- Built an interactive sales dashboard in Power BI Desktop with KPI cards, bar/line charts, and region/month slicers for dynamic filtering.
- Analyzed monthly trends and top-performing product categories from a sample sales dataset.

Personal Expense Tracker | Microsoft Excel

- Designed an expense-tracking workbook covering 8–10 spending categories with Pivot Table summaries and bar/pie chart visualizations.
- Automated category lookups and budget-limit flags using VLOOKUP and IF formulas; applied data validation to reduce manual entry errors.

SQL Data Queries — Sales & Customer Analysis | MySQL

- Wrote and documented SQL queries (SELECT, WHERE, GROUP BY, INNER JOIN) to extract customer, region, and period-based insights from a sample sales database.
- Used SUM, COUNT, and AVG functions to generate sales totals and customer counts by category.

EDUCATION

Bachelor of Commerce (B.Com) — Lajpat Rai College, Ghaziabad 2021 – 2024

Senior Secondary (Commerce) — NIOS Board, Delhi 2019

Secondary — CBSE Board, Delhi 2016

CERTIFICATIONS

- Tally ACE Certification — Tally Education Pvt. Ltd. (2023) — Accounting, GST, Payroll, Inventory
- Excel for Business — Coursera, Macquarie University
- Google Sheets for Beginners — Udemy

LANGUAGES

Hindi, English
